              1    "It varied. For our local programs it
                  was pretty good. Students had a very
                  difficult time assessing programs in
                  cities they were not familiar with."
              1    "Mixed. Applicants reported reasonable
                  understanding of the program. They often
                  reported a sense of the people they
                  would be working with but at the same
                  time would frequently "dismiss" any
                  sense of their "fit" with the other
                  people in the program as "possible just

                  compare virtual interviews to regular
                  interviews as I suspect these same
                  students might have slightly different

"Included everything component except an "internal ranking score"; and did not report individual IM NBME scores from the clerkship. I have serious ethical and philosophical reservations about providing these. When I met with each student, I informed them that I would be omitting these recommended components—nearly all students were in agreement and appreciative of not reporting thusly. Incidentally, I also included in the letter statements acknowledging these guidelines and why we were not providing this information.

I'm curious to know if the committee

that developed these recommendations, solicited the input of prospective applicants during the development process. - Chayan Chakraborti, Vice Chair, Tulane SOM"
